(The above instrument was written and the signatures
 appended for the objects therein stated before the survey
 of the Town Site was accurately made and its meter
 and bounds determined and marked with precision
 for the purposes of the contemplated location of the
 Wyandotte Float referred to and described in the papers
 setting forth the conditions of this arrangement, which
 specifications of meter and bounds were to have been sup-
 plied at the bottom of page 1 of this instrument, but as the
 legal question arose as to the effect of such alteration of the
 instrument after signature, the accompanying instrument
 was drawn up with the specifications, and a portion of the
 same signatures obtained to it, circumstances preventing its cir-
 culation and signature to the extent of the former one. — E. L. Add. Registered
