(The above instrument was written and the signature appended for the objects therein stated before the survey of the Town Site was accurately made and its metes and bounds determined and marked with precision for the purposes of the contemplated location of the Wyandotte Float referred to and described in the papers setting forth the conditions of this arrangement, which specifications of metes and bounds were to have been supplied at the bottom of page 1 of this instrument, but as the legal question arose as to the effect of such alteration of the instrument after signature, the accompanying instrument was drawn up with the specifications and a portion of the same signatures obtained to it, circumstances preventing its circulation and signature to the extent of the former one.

E. D. Ladd Register.
