Courthouse  
Refurbish clock

Fremont Hornberger, maintenance supervisor, appeared before the Board with a proposal from Star Signs & Graphics, Inc., Lawrence, Kansas, to fabricate and install four new clock faces in the county courthouse clock tower, that are constructed of the most durable, long lived, non-corrosive materials available with finished appearances to be as similar to original faces as possible. The proposal is to provide four 7 feet diameter clock faces, facing material of prepainted white acrylic enameled 0.040 aluminum sheet, re-inforced on back side with 3/4 inch aluminum angle. Each face will be manufactured in two pieces, with a vertical 7 foot seam, which will be caulked shut during installation. Roman numerals which will match existing numerals will be black vinyl. Hinged access panels will be provided to match up with existing access panels in wooden clock faces. During installation clock hands and counterbalances will be removed and hands will be weighed. New hands will be cut out of minimum 0.090 aluminum plate, maximum 0.250 aluminum plate. Thickness chosen will be based on appropriate ounces per square inch equivalent to old oak clock hands, to facilitate usage of existing counterbalances with minimum adjustment. Hands to be primed with aluminum primer and painted with black durepox enamel. New hands to be installed and counterbalances adjusted for minimum torque drag on clock motor. The total amount of this proposal is \$4152 and Mr. Hornberger recommended that the Board accept this proposal. After discussion it was moved by Mr. Neis that this proposal be approved pending approval from the Kansas State Historical Society and is to be paid from the maintenance budget, seconded by Mr. Cragan, and carried unanimously.
