LOCKWOOD CO., INC. REORDER NO. 126188-B-72

Clinton Lake:
Discussion on
recreational areas
& their development

The Board met with the following representatives of the Corps of Engineers: Ed Elkins, Gary McGinnis, Vic Counts, Tim Carey, Mike Ensich, and Carmeline Guinta. Also present were Roger Hedrick, Lawrence-Douglas County Planning Director; Fred DeVictor, Director of Parks & Recreation for the City of Lawrence; and interested citizens. The discussion related to the projected development of the recreational areas around Clinton Lake particularly Clinton State Park and Bloomington. Those areas are the ones in which the principal recreational areas will take place and the Board was interested in the nature and extent of this development as to its potential effect as to the commercial and residential zoning which may be necessitated in the Clinton Reservoir area. The Board indicated its desire to the representatives of the Corps to be involved in this planning process as it goes forward from this time. Mr. Elkins of the Kansas City District Office indicated that the Corps would forward a letter to this Board which would indicate its intent to review future plans by way of commercial or recreational development within these Corps controlled recreational areas.

Discussion on the
blasting of bridges

In addition, the Board discussed with the Corps representatives the blasting being done in removing the old bridges from the reservoir area. It was strongly requested by this Board that the intensity of this blasting be reduced, that the size of the charges used be substantially limited and that they be fired sequentially rather than simultaneously in order to limit the impact, that any smaller bridges in more dense residential areas be removed by machinery rather than blasting where possible, and finally, that better communications be provided to the community as to the projected time of specific blasting so that the neighborhood involved could be forewarned. The Corps representatives agreed to pursue these recommendations in an effort to minimize damage and concern amongst the citizens who are being affected by this blasting process.

The Board noted receipt from the Kansas State Board of Agriculture, division of water resources, of a permit for a proposed channel change and bridge construction project along Spring Creek at a location in the Southeast Quarter (SE $\frac{1}{4}$) of Section 23, and the Southwest Quarter (SW $\frac{1}{4}$) of Section 24, both in Township 13 South, Range 20 East, Douglas County, Kansas.

No further business, the Board adjourned to meet on Wednesday, November 2, 1977.
