

Line 6. A 6,000 volt, wood pole, electric transmission line, approximately twenty-four (24) miles in length, extending from the Town of Sylva, in Reno County, through the Town of Zenith, in Stafford County, through the Town of Stafford, in Stafford County, to the Town of Hildesheim, in Stafford County.

Line 7. A 33,000 volt, wood pole, electric transmission line, approximately eighty-six and eight-tenths (86.8) miles in length, extending from the steam electric generating station in the City of Hutchinson, in Reno County, through the Town of Medora, in Reno County, through the Town of Inman, in McPherson County, through the Town of Conway, in McPherson County, near the Town of Little River, in Rice County, through the Town of Mitchell, in Rice County, through the City of Lyons, in Rice County, near the Town of Sterling, in Rice County, through the Town of Nickerson, in Reno County, through the Town of Vesper, in Reno County, to the steam electric generating station in the City of Hutchinson, in Reno County.

Line 8. A 6,000 volt, wood pole, electric transmission line, approximately seventeen (17) miles in length, extending from the City of Hutchinson to the towns of Elmer, Castleton and Yoder in Reno County.

Line 9. A 33,000 volt, wood pole, electric transmission line, approximately thirty and eight-tenths (30.8) miles in length, extending from a junction with Line 6 at a point near the City of Lyons, in Rice County, through the Town of Chase, in Rice County, through the Town of Raymond, in Rice County, through the Town of Allen, in Rice County, to a point of connection with Line 7 at the Town of Sterling, in Rice County.

Line 10. A 33,000 volt, wood pole, electric transmission line, approximately fifty-five and five-tenths (55.5) miles in length, extending from a point of connection with Line 9 near the Town of Chase, in Rice County, through a point of connection with the electric transmission system of The Kansas Power Company near the City of Great Bend, in Barton County, through the Town of Pawnee Rock, in Barton County, to the City of Larned, in Pawnee County.

Line 11. An 11,000 volt, wood and steel pole, electric transmission line, approximately twenty-seven and five-tenths (27.5) miles in length, extending from the City of Larned, in Pawnee County, through the Town of Philia, in Pawnee County, through the Town of Sanford, in Pawnee County, through the Town of Boord, in Pawnee County, to the Town of Burdick, in Pawnee County.

Line 12. An 11,000 volt, wood pole, electric transmission line, approximately thirty-two and five-tenths (32.5) miles in length, extending from the City of Larned, in Pawnee County, through the Town of Belger, in Edwards County, through the Town of Trousdale, in Edwards County, to the Town of Felsburg, in Edwards County.

to a point of connection with the electric transmission system of the Kansas Gas and Electric Company near Burdick, in Harvey County.

Line 22. A 33,000 volt, wood pole, electric transmission line, approximately five (5) miles in length, extending from the Town of Conway, in McPherson County, to the City of McPherson, in McPherson County.

Line 23. A 33,000 volt, wood pole, electric transmission line, approximately twenty-nine and five-tenths (29.5) miles in length, extending from the City of McPherson, in McPherson County, through the Town of Lehigh, in Marion County, to the Town of Hillsboro, in Marion County.

Line 24. A 6,000 volt, wood pole, electric transmission line, approximately twelve and five-tenths (12.5) miles in length, extending from the City of Gypsum in Saline County to the town of Highbury in McPherson County.

Line 25. A 33,000 volt, wood pole, electric transmission line, approximately two and five-tenths (2.5) miles in length, extending from a point of intersection with Line 23 near the Town of Canton, in McPherson County, to the Town of Canton, in McPherson County.

Line 26. A 33,000 volt, wood pole, electric transmission line, approximately twenty-two and two-tenths (22.2) miles in length, extending from a point of junction with Line 7 near the Town of Inman, in McPherson County, to a point of junction with Line 23, five (5) miles east of the City of McPherson, in McPherson County.

Line 27. A 33,000 volt, wood pole, electric transmission line, approximately thirty-nine (39) miles in length, extending from the City of McPherson, in McPherson County, through a point near the Town of Lindburg, in McPherson County, to the steam electric generating station in the City of Salina, in Saline County.

Line 28. A 33,000 volt, wood pole, electric transmission line, approximately nine (9) miles in length, extending from a point of connection with Line 27 near the Town of Lindburg, in McPherson County, to the Town of Marquette, in McPherson County.

Line 29. A 33,000 volt, wood pole, electric transmission line, approximately forty-two (42) miles in length, extending from the steam electric generating station in the City of Salina, in Saline County, through the Town of Bennington, in Ottawa County, to the Town of Delphos, in Ottawa County, and a connection with the electric transmission system of The Kansas Power Company near the Town of Delphos, in Ottawa County.

Line 30. A 13,200 volt, wood pole, electric transmission line, approximately seven and five-tenths (7.5) miles in length, extending from Line 29 to the town of Wells in Ottawa County.

Line 31. A 13,200 volt, wood pole, electric transmission line, approximately ten and five-tenths (10.5) miles in length, extending from a point

Line 13. A 11,000 volt, wood pole, electric transmission line, approximately four (4) miles in length, extending from the town of Felsburg to the town of Conterview in Edwards County.

Line 14. All of the Company's interest in an 11,000 volt, wood pole, electric transmission line, approximately seven and five-tenths (7.5) miles in length, extending from the Town of Belger, in Edwards County, to the Town of Macksville, in Stafford County under the contract between The Pawnee Power and Water Company and the City of Macksville dated February 7, 1921.

Line 15. An 11,000 volt, wood and steel pole, electric transmission line, approximately thirty-one (31) miles in length, extending from the Town of Belger, in Edwards County, to the Town of Lewis, in Edwards County, through the Town of Kinley, in Edwards County, to the Town of Offiler.

Line 16. An 11,000 volt, steel pole, electric transmission line, approximately seventeen (17) miles in length, extending from the Town of Philia, in Pawnee County, through the Town of Garfield, in Pawnee County, to a point of connection with Line 15 near the Town of Lewis, in Edwards County.

Line 17. A 33,000 volt, wood pole, electric transmission line, approximately thirty-six and three-tenths (36.3) miles in length, extending from a point of junction with Line 7 between the Town of Mitchell, in Rice County, and the City of Lyons, in Rice County, through the Town of Geneva, in Rice County, through the Town of Frederick, in Rice County, through a point of connection with the electric transmission system of The Kansas Power Company at a point near the Town of Frederick, in Rice County, through the Town of Union, in Rice County, through the Town of Clifton, in Barton County, to a point of connection with the electric transmission system of The Kansas Power Company near the Town of Hedding, in Barton County.

Line 18. A 6,000 volt, wood pole, electric transmission line, approximately ten (10) miles in length, extending from the Town of Clifton, in Barton County, to the Town of Hedding, in Barton County, with a branch to the Town of Oler, in Barton County.

Line 19. A 33,000 volt, wood pole, electric transmission line, approximately three and six-tenths (3.6) miles in length, extending from a point on Line 7 between the City of Lyons, in Rice County, and the Town of Sterling, in Rice County, to the Town of Saxman, in Rice County.

Line 20. A 6,000 volt, wood pole, electric transmission line, approximately six (6) miles in length, extending from the Town of Little River, in Rice County, to the Town of Windom, in McPherson County.

Line 21. A 60,000 volt, wood pole, electric transmission line, approximately fourteen and five-tenths (14.5) miles in length, extending from the steam electric generating station in the City of Hutchinson, in Reno County,

to a point of connection with the electric transmission system of the Kansas Gas and Electric Company near Burdick, in Harvey County.

Line 32. A 13,200 volt, wood pole, electric transmission line, approximately twenty-seven (27) miles in length, extending from the Town of Bennington, in Ottawa County, through the Town of Tecum, in Ottawa County, to the Town of Beverly, in Lincoln County, and including the branch to Town of Culver, in Ottawa County.

Line 33. A 13,200 volt, wood pole, electric transmission line, approximately two and twenty-five hundredths (2.25) miles in length, extending from the City of Beverly to the town of Shady Bend in Lincoln County.

Line 34. A 13,200 volt, wood pole, electric transmission line, approximately twenty (20) miles in length, extending from the Town of Tecum, in Ottawa County, through the Town of Ada, in Ottawa County, to the Town of Barnard, in Lincoln County.

Line 35. A 13,200 volt, wood pole, electric transmission line, approximately seven and five-tenths (7.5) miles in length, extending from Line 33 to the town of Westfall in Lincoln County.

Line 36. A 33,000 volt, wood pole, electric transmission line, approximately twenty-five and two-tenths (25.2) miles in length, extending from the steam electric generating station in the City of Salina, in Saline County, to the Riverside steam and hydro electric generating station near the City of Abilene, in Dickinson County.

Line 37. A 33,000 volt, wood pole, electric transmission line, approximately ten (10) miles in length, extending from a point of connection with Line 36 approximately ten (10) miles east of the Town of Salina, in Saline County, to the Town of Gypsum, in Saline County.

Line 38. A 6,000 volt, wood pole, electric transmission line, approximately six and five-tenths (6.5) miles in length, extending from the Town of Gypsum, in Saline County, to the Town of Kipp, in Saline County.

Line 39. A 6,000 volt, wood pole, electric transmission line, approximately thirty-two (32) miles in length, extending from the Town of Gypsum, in Saline County, through the Town of Asa, in Saline County, through the Town of Mentor, in Saline County, through the Town of Soudan, in Saline County, to the Town of Blytheville, in Saline County.

Line 40. A 6,000 volt, wood pole, electric transmission line, approximately four (4) miles in length, extending from the Town of Asa, in Saline County, to the Town of Bridgeport, in Saline County.

Line 41. A 6,000 volt, wood pole, electric transmission line, approximately eight and seven-tenths (8.7) miles in length, extending from a point of junction with Line 37 near the Town of Soudan, in Saline County, through the Town of Falm, in Saline County, to the Town of Salomeburg, in Saline County.
