

Line 42. A 6900 volt, wood pole, electric transmission line, approximately two (2) miles in length, extending from a point of junction with Line 39 near the Town of Sedan, in Saline County, to the Town of Barvira, in Saline County.

Line 43. A 33,000 volt, wood pole, electric transmission line, approximately forty-three and eight-tenths (43.8) miles in length, extending from the Riverside steam and hydro electric generating station near the City of Abilene, in Dickinson County, to the Town of Morganville, in Clay County.

Line 44. An 11,000 volt, wood pole, electric transmission line, approximately thirteen (13) miles in length, extending from the Riverside steam and hydro electric generating station near the City of Abilene, in Dickinson County, to the Town of Buckeye, in Clay County, with a two (2) mile connection to Line 43 near Buckeye.

Line 45. A 33,000 volt, wood pole, electric transmission line, approximately forty-eight (48) miles in length, extending from the Riverside steam and hydro electric generating station near the City of Abilene, in Dickinson County, through the Town of Detroit and the Town of Chapman, in Dickinson County, through a point two (2) miles north of the City of Junction City, in Geary County, through the Town of Ogden, in Riley County, to the Rocky Ford steam and hydro electric generating station, near the City of Manhattan, in Riley County.

Line 46. A 33,000 volt, wood pole, electric transmission line, approximately seventeen (17) miles in length, extending from a point of junction with Line 45 near the Town of Chapman, in Dickinson County, to the Town of Wakefield, in Clay County.

Line 47. A 33,000 volt, wood pole, electric transmission line, approximately seven (7) miles in length, extending from a point of junction with Line 46 in Clay County, to the Town of Milford, in Geary County.

Line 48. An 11,000 volt, wood pole, electric transmission line, approximately twelve (12) miles in length, extending from the Town of Chapman, in Dickinson County, through the Town of Uland, in Dickinson County, to the point of junction on Line 46 in Clay County.

Line 49. A 33,000 volt, wood pole, electric transmission line, approximately sixty-one (61) miles in length, extending from a point of junction with Line 36 near the City of Abilene, in Dickinson County, through the Town of Hillsboro, in Marion County, to the Town of Florence, in Marion County.

Line 50. An 11,000 volt, wood pole, electric transmission line, approximately six and five-tenths (6.5) miles in length, extending from the Town of Hillsboro, in Marion County, to the Town of Canada, in Marion County.

Line 51. A 6,000 volt, wood pole, electric transmission line, approximately five (5) miles in length, extending from a point of junction with Line 49 near the Town of Elmo, in Dickinson County, through the Town

Line 63. An 11,000 volt, wood pole, electric transmission line, approximately thirty-five (35) miles in length, extending from a junction with Line 54 at a point near the Town of Woodbine, in Dickinson County, through the Town of Woodbine, in Dickinson County, through the Town of White City, in Morris County, through the Town of Dwight, in Morris County, to the Town of Alta Vista, in Wabasha County.

Line 64. An 11,000 volt, wood pole, electric transmission line, approximately six (6) miles in length, extending from a point of junction with Line 63 in Morris County to the Town of Latimer, in Morris County.

Line 65. An 11,000 volt, wood pole, electric transmission line, approximately three and five-tenths (3.5) miles in length, extending from a point of junction with Line 63 in Morris County to the Town of Parkerville, in Morris County.

Line 66. An 11,000 volt, wood pole, electric transmission line, approximately twenty-seven (27) miles in length, extending from the Riverside steam and hydro electric generating plant near the City of Abilene, in Dickinson County, through the Town of Sand Springs, in Dickinson County, through the Town of Solomon, in Dickinson County, to the Town of New Cambria, in Saline County.

Line 67. An 11,000 volt, wood pole, electric transmission line, approximately thirty-seven (37) miles in length, extending from a point of junction with Line 66 near Sand Springs, in Dickinson County, through the Town of Manchester, in Dickinson County, through the Town of Langford, in Clay County, through the Town of Oak Hill, in Clay County, to the Town of Milnorville, in Cloud County.

Line 68. An 11,000 volt, wood pole, electric transmission line, approximately three (3) miles in length, extending from a point of junction with Line 67 in Dickinson County to the Town of Talmage, in Dickinson County.

Line 69. An 11,000 volt, wood pole, electric transmission line, approximately three (3) miles in length, extending from a point of junction with Line 68 near the Town of Detroit, in Dickinson County, through the Town of Enterprise, in Dickinson County, to a point of junction with Line 54 in Dickinson County.

Line 70. An 11,000 volt, wood pole, electric transmission line, approximately twelve (12) miles in length, extending from the Riverside steam and hydro electric generating station, near the City of Abilene, in Dickinson County, to the Town of Pearl, in Dickinson County.

Line 71. A 33,000 volt, wood pole, electric transmission line, approximately forty (40) miles in length, extending from the Rocky Ford steam and hydro electric generating station, near the City of Manhattan, in Riley County, to the Town of Garrison, in Pottawatomie County, through the Town of Randolph, in Riley County, through the Town of Cleburne, in Riley County, to the Town of Blue Rapids, in Marshall County.

of Elmo, in Dickinson County, to the Town of Carlton, in Dickinson County.

Line 52. A 33,000 volt, wood pole, electric transmission line, approximately four (4) miles in length, extending from a junction with Line 49 near the City of Florence, in Marion County, to a point of connection with the electric transmission system of the Kansas General Electric Company, in Marion County.

Line 53. An 11,000 volt, wood pole, electric transmission line, approximately fifteen (15) miles in length, extending from the Town of Florence, in Marion County, to the Town of Peabody, in Marion County.

Line 54. A 33,000 volt, wood pole, electric transmission line, approximately thirty-five (35) miles in length, extending from the Riverside steam and hydro electric generating station, near the City of Abilene, in Dickinson County, to the Town of Last Springs, in Marion County.

Line 55. An 11,000 volt, wood pole, electric transmission line, approximately seven and five-tenths (7.5) miles in length, extending from the Town of Last Springs to the Town of Kansas, in Marion County.

Line 56. An 11,000 volt, wood pole, electric transmission line, approximately six and five-tenths (6.5) miles in length, extending from the Town of Last Springs to the Town of Elsen, in Marion County.

Line 57. An 11,000 volt, wood pole, electric transmission line, approximately fourteen and five-tenths (14.5) miles in length, extending from a point of junction with Line 56, through the Town of Tanter, to the Town of Durham, in Marion County.

Line 58. An 11,000 volt, wood pole, electric transmission line, approximately eight and five-tenths (8.5) miles in length, extending from the Town of Last Springs, in Marion County, to the Town of Burdick, in Marion County.

Line 59. An 11,000 volt, wood pole, electric transmission line, approximately four and five-tenths (4.5) miles in length, extending from a junction with Line 58 to the Town of Lincolnville, in Marion County.

Line 60. A 6,000 volt, wood pole, electric transmission line, approximately five (5) miles in length, extending from the City of Lincolnville to the town of Antelope, in Marion County.

Line 61. A 6,000 volt, wood pole, electric transmission line, approximately two (2) miles in length, extending from a junction with Line 54 to the Town of Hope, in Dickinson County.

Line 62. An 11,000 volt, wood pole, electric transmission line, approximately three and five-tenths (3.5) miles in length, extending from a junction with Line 51 to the Town of Navarre, in Dickinson County.

Line 72. A 33,000 volt, wood pole, electric transmission line, approximately eleven and eight-tenths (11.8) miles in length, extending from the Town of Blue Rapids, in Marshall County, to the Town of Marysville, in Marshall County.

Line 73. A 13,200 volt, wood pole, electric transmission line, approximately seventeen (17) miles in length, extending from the Town of Marysville, in Marshall County, through the Town of Harker, in Marshall County, through the Town of Bremen, in Marshall County, to the Town of Hazover, in Washington County.

Line 74. A 6,000 volt, wood pole, electric transmission line, approximately twelve and three-tenths (12.3) miles in length, extending from the Town of Marysville, in Marshall County, through the Town of Home, in Marshall County, to the Town of Bettie, in Marshall County.

Line 75. A 6,000 volt, wood pole, electric transmission line, approximately seven and five-tenths (7.5) miles in length, extending from a point of junction with Line 74 near the Town of Marysville, in Marshall County, to the Town of Oleta, in Marshall County.

Line 76. A 33,000 volt, wood pole, electric transmission line, approximately one hundred sixteen (116) miles in length, extending from the Town of Blue Rapids, in Marshall County, to the Town of Frankfort, in Marshall County, to the Town of Vernet, in Marshall County, through the Town of Vermilion, in Marshall County, through the Town of Centuria, in Nemaha County, through the Town of Seneca, in Nemaha County, through the Town of Fairview, in Brown County, through the City of Hiawatha, in Brown County, to the City of Atchison, in Atchison County.

Line 77. An 11,500 volt, wood pole, electric transmission line, approximately twenty-seven and five-tenths (27.5) miles in length, extending from the Rocky Ford steam and hydro electric generating station near the Town of Manhattan, in Riley County, through the Town of Pottawatomie County, through the Town of Randolph, in Riley County, to the Town of Cleburne, in Riley County.

Line 78. An 11,500 volt, wood pole, electric transmission line, approximately fifteen (15) miles in length, extending from a point of junction with Line 77 between the Towns of Garrison, in Pottawatomie County, and Randolph, in Riley County, through the Town of Leonardville, in Riley County, to the Town of Riley, in Riley County.

Line 79. An 11,500 volt, wood pole, electric transmission line, approximately eighteen (18) miles in length, extending from a point of junction with Line 77 between the Towns of Garrison, in Pottawatomie County, and Randolph, in Riley County, through the Town of Olsburg, in Pottawatomie County, through the Town of Pottawatomie County, to the Town of Westmoreland, in Pottawatomie County.
