

Line 80. A 13,200 volt, wood pole, electric transmission line, approximately twenty-two (22) miles in length, extending from the Town of Centralia, in Nemaha County, through the Town of Corning, in Nemaha County, through the Town of God, in Nemaha County, to the Town of Wetmore, in Nemaha County.

Line 81. A 2,300 volt, wood pole, electric transmission line, approximately three (3) miles in length, extending from Line 80 to the town of Danforth in Nemaha County.

Line 82. A 13,200 volt, wood pole, electric transmission line, approximately three and five-tenths (3.5) miles in length, extending from a point of junction with Line 81 near the Town of Corning, in Nemaha County, to the Town of Kelly, in Nemaha County.

Line 83. A 6,000 volt, wood pole, electric transmission line, approximately fourteen (14) miles in length, extending from the Town of Seneca, in Nemaha County, to the Town of Bern, in Nemaha County.

Line 84. A 6,000 volt, wood pole, electric transmission line, approximately two (2) miles in length, extending from a point of junction with Line 83 in Nemaha County to the Town of Ochoa, in Nemaha County.

Line 85. A 6,000 volt, wood pole, electric transmission line, approximately nine (9) miles in length, extending from the Town of Frankfort, in Marshall County, through the Town of Vicks, in Marshall County, to the Town of Vermilion in Marshall County.

Line 86. A 6,000 volt, wood pole, electric transmission line, approximately seven and five-tenths (7.5) miles in length, extending from Line 76 to the town of Winfield in Marshall County.

Line 87. A 6,000 volt, wood pole, electric transmission line, approximately three and five-tenths (3.5) miles in length, extending from a point of junction with Line 76 near Bigelow, in Marshall County, to the Town of Bigelow, in Marshall County.

Line 88. A 6,000 volt, steel pole, electric transmission line, approximately four (4) miles in length, extending from the Town of Blue Rapids, in Marshall County, to the Town of Irving, in Marshall County.

Line 89. A 6,000 volt, wood pole, electric transmission line, approximately four and five-tenths (4.5) miles in length, extending from the Town of Blue Rapids, in Marshall County, to the Town of Waterville, in Marshall County.

Line 90. A 33,000 volt, wood pole, electric transmission line, approximately four and five-tenths (4.5) miles in length, extending from the Rocky Ford steam and hydro electric generating station, near the City of Manhattan, in Riley County, to the City of Manhattan, in Riley County.

Line 100. A 6,000 volt, wood pole, electric transmission line, approximately nine and five-tenths (9.5) miles in length, extending from the Town of Russell, in Shawnee County, through the Town of Willard, in Shawnee County, to the Town of Maple Hill, in Shawnee County.

Line 101. A 6,000 volt, wood pole, electric transmission line, approximately four and eight-tenths (4.8) miles in length, extending from a point of junction with Line 100 near the Town of Willard, in Shawnee County, to the Town of Silver Lake, in Shawnee County.

Line 102. A 33,000 volt, wood pole, electric transmission line, approximately twenty-eight (28) miles in length, extending from a point of junction in Jackson County on Line 93 near the Town of Hoyt, in Jackson County, through the Town of Hoyt, in Jackson County, through the Town of Mayetta, in Jackson County, to the Town of Circleville, in Jackson County.

Line 103. A 13,200 volt, wood pole, electric transmission line, approximately forty-six (46) miles in length, extending from the Town of Circleville, in Jackson County, through the Town of Soldier, in Jackson County, through the Town of Havensville, in Pettawatomie County, through the Town of Omaha, in Pettawatomie County, through the Town of Daltell, in Pettawatomie County, through the Town of Viboston, in Pettawatomie County, through the Town of Iliquo, in Pettawatomie County, to a point of connection with Line 79 near the Town of Westmoreland, in Pettawatomie County.

Line 104. A 13,200 volt, wood pole, electric transmission line, approximately seven (7) miles in length, extending from a point of connection with Line 102 of like voltage between the Town of Mayetta, in Jackson County, and the Town of Circleville, in Jackson County, near the Town of Birmingham, in Jackson County, through the Town of Birmingham, in Jackson County, to the Town of Denton, in Jackson County.

Line 105. A 13,200 volt, steel and wood pole, two circuit electric transmission line, approximately seven (7) miles in length, extending from the steam electric generating station at Tecumseh, near the City of Topeka, in Shawnee County, to the City of Topeka.

Line 106. A 13,200 volt, wood pole, electric transmission line, approximately eight (8) miles in length, extending from the steam electric generating station at Tecumseh, near the City of Topeka, in Shawnee County, to the City of Topeka.

Line 107. A 13,200 volt, wood pole, electric transmission line, approximately fifty-three (53) miles in length, extending from the City of Topeka, in Shawnee County, through the Town of Pauline, in Shawnee County, through the Town of Wakarusa, in Shawnee County, through the Town of Carbondale, in Osage County, through the Town of Elliott Center, in Osage County, through the Town of Harveysville, in Waukegan County, in the Town of Edgemoor, in Waukegan County.

Line 91. A 6,000 volt, wood pole, electric transmission line, approximately seven (7) miles in length, extending from the City of Manhattan, in Riley County, to the Town of Keats, in Riley County.

Line 92. A 6,000 volt, wood pole, electric transmission line, approximately nine (9) miles in length, extending from the Rocky Ford steam and hydro electric generating station, near the City of Manhattan, in Riley County, to the Town of St. George, in Pettawatomie County.

Line 93. A 33,000 volt, wood pole, electric transmission line, approximately seventy-five and eight-tenths (75.8) miles in length, extending from the Rocky Ford steam and hydro electric generating station near the City of Manhattan, in Riley County, through the Town of Wanego, in Pettawatomie County, through the Town of Helene, in Pettawatomie County, through the Town of St. Mary, in Pettawatomie County, to the steam electric power station at Tecumseh, near the City of Topeka, in Shawnee County.

Line 94. All of the Company's interest in a 6,000 volt, wood pole, electric transmission line, approximately ten and five-tenths (10.5) miles in length, extending from the Town of St. Mary, in Pettawatomie County, to the Town of Emmett, in Pettawatomie County, under the contract between The Rocky Ford Milling and Power Company and the City of Emmett dated September 11, 1922.

Line 95. A 6,000 volt, wood pole, electric transmission line, approximately one (1) mile in length, extending from a point of junction with Line 93 in Pettawatomie County to the Town of Delia, in Shawnee County.

Line 96. A 6,000 volt, wood pole, electric transmission line, approximately one and five-tenths (1.5) miles in length, extending from a point of junction with Line 95 near the Town of Wanego, in Pettawatomie County, to the Town of Louisville, in Pettawatomie County.

Line 97. A 33,000 volt, wood pole, electric transmission line, approximately sixteen (16) miles in length, extending from Line 96 near the Town of Wanego, in Pettawatomie County, to the Town of Alma, in Waukegan County.

Line 98. A 6,000 volt, wood pole, electric transmission line, approximately thirteen (13) miles in length, extending from the Town of Alma, in Waukegan County, through the Town of McFarland, in Waukegan County, through the Town of Paxton, in Waukegan County, to the Town of Newburg, in Waukegan County.

Line 99. A 33,000 volt, wood pole, electric transmission line, approximately seven and five-tenths (7.5) miles in length, extending from a point of junction with Line 93 in Jackson County near the Town of Delia, in Jackson County, to the Town of Rossville, in Shawnee County.

Line 108. A 6,000 volt, wood pole, electric transmission line, approximately seven (7) miles in length, extending from a point of junction with Line 107 near the Town of Carbondale, in Osage County, to the Town of Overlook, in Osage County.

Line 109. A 6,000 volt, wood pole, electric transmission line, approximately ten (10) miles in length, extending from a point of junction with Line 107 near the Town of Pauline, in Shawnee County, through the Town of Berryton, in the Town of Richland, in Shawnee County.

Line 110. A 6,000 volt, wood pole, electric transmission line, approximately six (6) miles in length, extending from the City of Topeka, in Shawnee County, to the Town of Mendon, in Shawnee County.

Line 111. A 2,300 volt, wood pole, electric transmission line, approximately one and three-tenths (1.3) miles in length, extending from a point of junction with Line 93 near the steam electric generating station at Tecumseh, in Shawnee County, to the Town of Crestville, in Jefferson County.

Line 112. A 6,000 volt, steel pole, two circuit electric transmission line, approximately forty-eight (48) miles in length, extending from the steam electric generating station at Tecumseh, near the City of Topeka, in Shawnee County, through the Town of Meriden, in Jefferson County, through the Town of Valley Falls, in Jefferson County, through the Town of Nortonville, in Jefferson County, to the City of Atchison, in Atchison County.

Line 113. A 11,000 volt, wood pole, electric transmission line, approximately twenty-four and five-tenths (24.5) miles in length, extending from the Town of Valley Falls, in Jefferson County, through the Town of Boyle, in Jefferson County, through the Town of Oaklawn, in Jefferson County, to the Town of McLeansville, in Jefferson County.

Line 114. A 11,000 volt, wood pole, electric transmission line, approximately three and eight-tenths (3.8) miles in length, extending from a point of junction with Line 113 near the Town of Boyle, in Jefferson County, to the Town of Nortonville, in Jefferson County.

Line 115. A 6,000 volt, wood pole, electric transmission line, approximately two and five-tenths (2.5) miles in length, extending from a point of junction with Line 113 near the Town of Boyle, in Jefferson County, to the Town of Nortonville, in Jefferson County.

Line 116. A 6,000 volt, wood pole, electric transmission line, approximately sixteen (16) miles in length, extending from the City of Valley Falls through the town of Rock Creek to the town of Ozark in Jefferson County.

Line 117. A 6,000 volt, wood pole, electric transmission line, approximately eight (8) miles in length, extending from the City of Atchison, in Atchison County, to the Town of Doniphan, in Doniphan County.
